

# Unit Price Options - 2025

Insured producers may select a Unit Price for each insurable crop. The unit price is used to determine the total value of the insured crop under the contract of insurance. In the event of a claim, the unit price is multiplied by any shortfall in production to determine the amount of the claim payable.

Crop	Unit Price (\$)			
	Low	Medium	High	Extra
Rye	\$0.2/kg	\$0.22/kg	\$0.24/kg	
Triticale	\$0.205/kg	\$0.225/kg	\$0.245/kg
